Re: Tynagh Energy Limited Response to the Consultation on Generation Adequacy, Capacity Mechanisms and the Internal Market in Electricity

Dear Sirs,

Tynagh Energy Limited (TEL) represents a highly skilled collaboration of international and local expertise which came together to build a 400MW Combined Cycle Power Plant as an independent power producer in east Co. Galway, Ireland. TEL is a market participant in the Single Electricity Market on the island of Ireland.

TEL welcomes the opportunity provided by the Commission to comment on energy policy matters which we believe are of critical importance to the future development of the electricity sector within the Single Electricity Market (SEM) and Europe in the context of a competitive, sustainable and integrated market. As a member of the Electricity Association of Ireland (EAI), TEL endorses the EAI response to this consultation. A copy of this response has been enclosed.

Yours faithfully,

John O'Connor
General Manager
